

# 2025

# NMFC CHANGES

The National Motor Freight Traffic Association, Inc. (NMFTA)<sup>™</sup> is reimagining the National Motor Freight Classification (NMFC)<sup>®</sup> and docket 2025-1 will be focused on standardizing the evaluation of all commodities when density is the primary transportation characteristic.

## The strategy for 2025-1 is

1. Expanded FCDC 11-subprovision density progression to 13 – sub by adding classes 50 and 55. This will affect all current items that are already at full density.
2. Make all items with modified density breaks but NO handling, stowability and liability issues 13 – sub full density items.
3. Make single class items with NO handling, stowability and liability issues 13 – sub full density items.
4. Make subprovision items with multiple classes and NO handling, stowability and liability issues 13 – sub full density items.

Please note that the items on the attached list are currently under review and do not constitute an official docket. The inclusion of these items in the 2025-1 docket will be determined upon review by the NMFTA. Importantly, the NMFTA will not release or discuss the specific plan for any item on this list prior to the release of the 2025-1 docket. This list is provided so that interested parties can analyze how the proposed changes may affect them once the 2025-1 docket goes into effect. It is not meant to be a comprehensive list of all items in the NMFC. Once the 2025-1 docket is released, we will welcome feedback through our normal channels.

Send feedback to [classification@nmfta.org](mailto:classification@nmfta.org). We cannot comment regarding changes to any specific item until docket 2025-1 is released in January of 2025.

Item	Current Provisions	Generic Heading
1050	11-sub density scale	No
2070	11-sub density scale	No
